## **Pennex Ltd. COVID-19 Statement**

In light of the recent developments with regards to the COVID-19 pandemic, it is an appropriate time to provide another update reiterating our procedures and practices. We have remained open throughout the pandemic, and will continue to do so, due to our key position in the logistics and transport industry. Our stringent safety measures have been in place throughout and aim to prevent the spread of the virus, curtail its impact and ensure the health and safety of all our employees and the general public.

Comprehensive risk assessments were carried out at the start of the pandemic and have been reviewed continuously since. Mitigating actions set out in the previous COVID-19 Statement were, and will continue to be, closely adhered to. Particularly pertinent at this time are measures including: hand sanitizer stations at entry/exit points to the building; socially distanced workstations; scientifically-approved PPE; extensive floor markings and signage; staggered breaks; and frequent deep cleaning.

Management keeps a close eye on new government policy and scientific advice, and constantly updates our practices in line with this.

With careful, detailed planning and dedicated service by our employees, we are continuing to offer our specialist, bespoke service to both existing and new customers.

Thank you to our employees, clients and stakeholders for their continued support throughout the pandemic. Please get in touch with a member of our team if you would like to know more about our COVID-19 procedure.
